## Five Core Principles to Keep AI Ethical

# UN Convention Letter

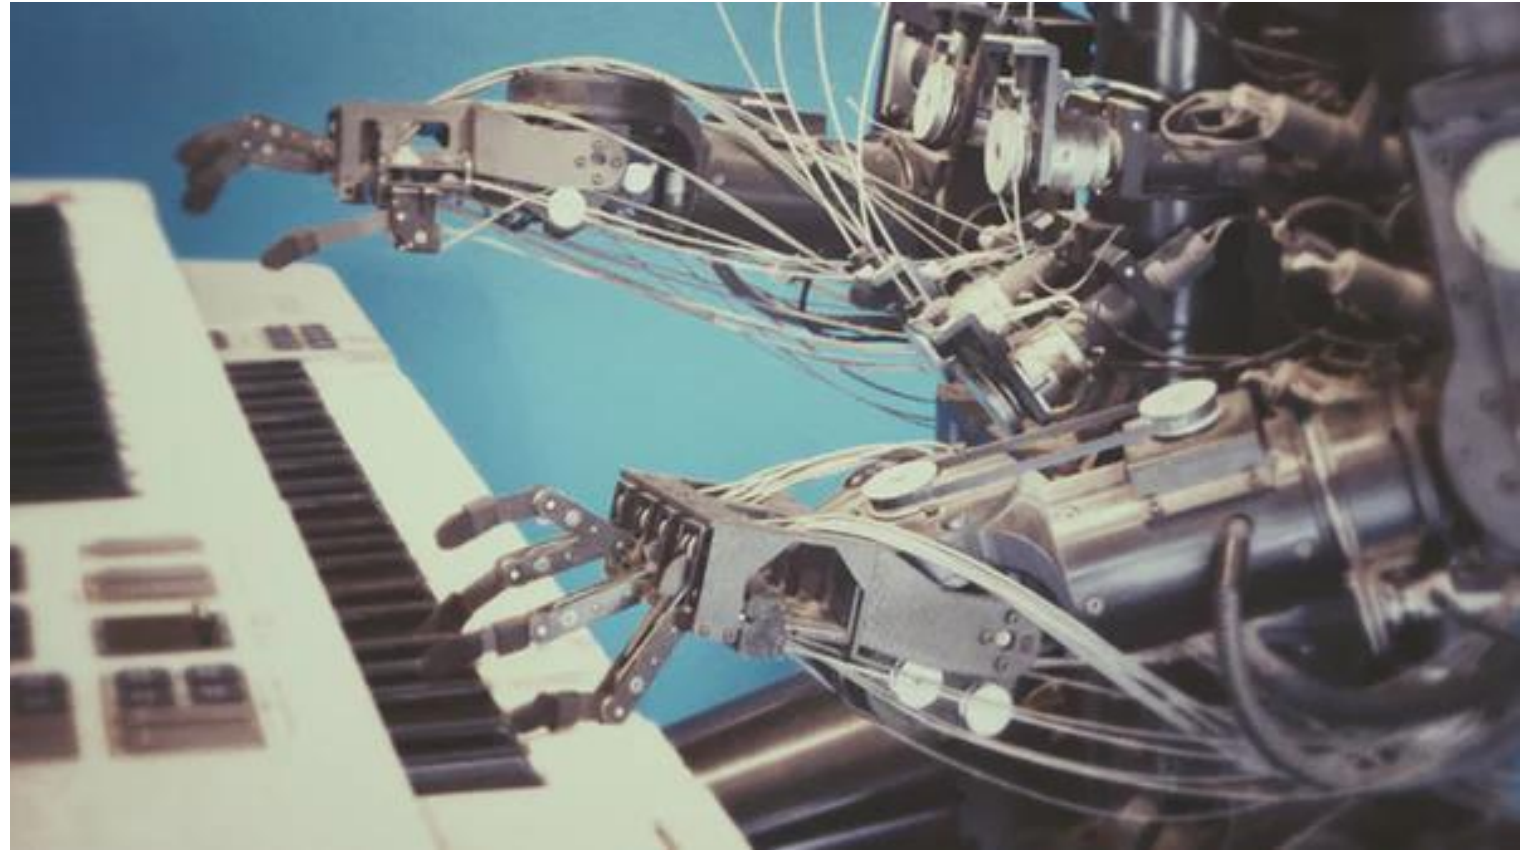

---

In an open letter to the UN Convention on Certain Conventional Weapons, the signatories said that once developed, killer robots “will permit armed conflict to be fought at a scale greater than ever, and at timescales faster than humans can comprehend.”

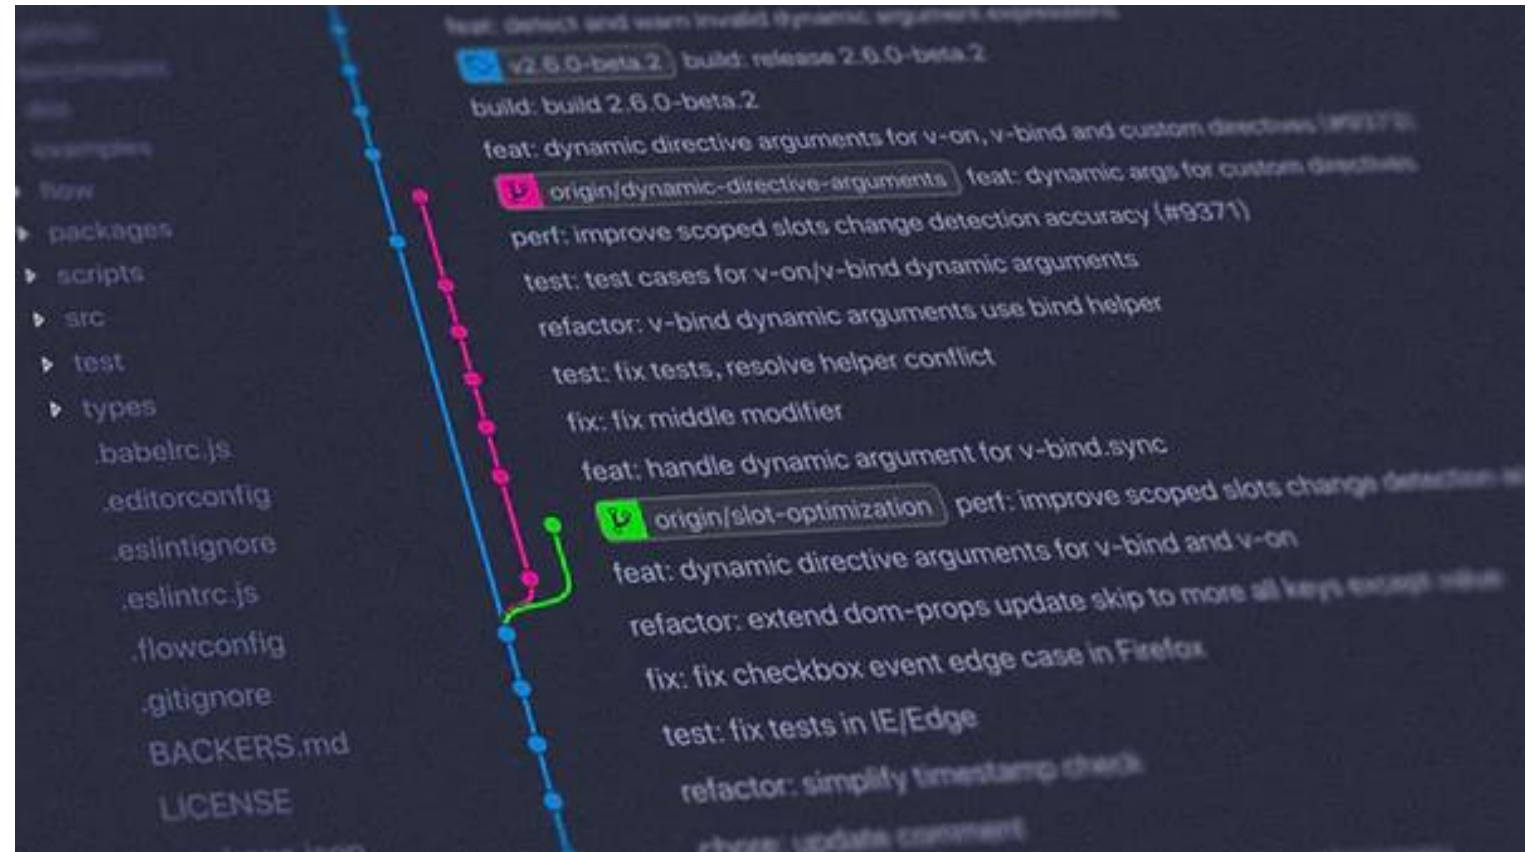

Principle #1:  
AI Must Be a  
Force for  
Good - and  
Diversity

Principle #2:  
Intelligibility  
and Fairness

# Principle #3: Data Protection

Principle #4:  
Flourishing  
alongside AI

Principle #5:  
Confronting  
the Power to  
Destroy

The End
